

Bulk Measurement (Room Temperature Only)

- **Bulk-on-Support**

- Samples can be of different shape, e.g. rod, cube, pallet, plate, fractured tension plate/bar.
- Support is provided onsite for sample mounting.
- The more volume of sample that can fill in the nominal gauge volume of ($12 \times 12 \times 8 \text{ mm}^3$), the stronger scattering signals.
- Medium size of $12 \times 12 \times 2 \text{ mm}^3$ is recommended for strong neutron absorbing samples.
